Attn: Anthony A. Gallegos, Senior Reclamation Specialist

Attached is the 1999 Annual Report of Mining Operations for Uintah Mountain Copper Company's Sunshine Quartz/Hematite Claims Project as required by Utah law.

The Forest Service continues with the EA on our future test pit development phases. Field work was performed by their specialists this past summer. We anticipate completion of their work soon and intend to perform our pit operations during the summer/fall of 2000. The off-site plant design is also underway and we hope to begin plant test operations later this year.

Enclosed is the case history paper I mentioned last year on gabion slope stabilization in difficult terrain that was presented at the 37th US Rock Mechanics Symposium. The case history includes our project in the Uintas.

Please call us if you have any questions or need further information.

Sincerely,

Peter Kandaris
President, Uintah Mountain Copper Company
